SPECIAL MACHINES

FOR STRAIGHTENING AND BENDING

We design and construct client-specific straightening, bending and other special machines for production lines. Our standard straightening and bending machines typically offer pressure forces of up to 120 tons, our special machines, however, can reach up to 800 tons. Of course, you can count on our know-how all along the planning process of your client-specific special machine.

Simply get in touch with us.

FUNCTIONAL AND STABLE - EXTREMELY VERSATILE

Kunkel straightening and bending machines have been in use for many decades. From simple mobile devices to the standard version for bending rails and substructures to custom-made machines, we offer a wide range of solutions for manufactures, industry and the transportation infrastructure. Our technically mature, constantly updated and highly qualified machines allow us to meet the demands of our customers – such as the unrivaled precision in straightening and bending – every day.

Rudolf Kunkel Maschinenbau GmbH

BY PRACTITIONERS FOR PRACTITIONERS

We have been building straightening and bending machines for 3 generations. Customers can't only expect quality „Made in Germany“, but also a high investment security. Kunkel machines retain their value. When deciding on a stronger, technically more advanced or newer machine we will accept the „old one“ in payment. We offer a comprehensive know-how and a powerful service.

STRAIGHTENING AND BENDING MACHINES FROM KUNKEL

Kunkel machines are suitable for manufacturing as well as industrial production. Our straightening and bending machines cause only negligible follow-up costs. All Kunkel tool holders are also suitable for self-made or existing tools / convertible. Another plus is the ease of use - every worker in your company can operate these machines. We offer machines for every budget. You have the choice – from cam control to fully automatic PC control. Upgrading and the trade-in of old Kunkel machines is possible.

WE OFFER COMPLETE SOLUTIONS - ACCORDING TO YOUR WISHES!
